

Smart Micro-Market Proposal for Perry Commercial

About Switchback Vending

At Switchback Vending LLC, we provide modern, reliable, and fully managed refreshment solutions tailored to your commercial real estate properties and corporate office spaces. We understand that Perry Commercial sets a high standard for tenant amenities. Our goal is to provide a premium food and beverage experience that enhances your building's appeal, while requiring zero daily effort from your property management team.

The Vision: A High-Tech, Secure Micro-Market Solution

Traditional open micro-markets are popular for their product variety, but they introduce a major pain point for property managers: shrink, theft, and inventory loss from honor-system checkout kiosks. On the other hand, traditional coiled vending machines restrict product sizing and lack a modern aesthetic.

Our **AI Smart Vending Coolers** deliver the open, visual appeal of a micro-market paired with **100% security against theft**.

How AI Smart Vending Works:

- **Tap-to-Unlock:** The glass door remains securely locked at all times. Tenants simply tap their credit card, Apple Pay, or Google Wallet to unlock the door.
- **Grab & Go:** Tenants open the door and pick up whatever they want. Just like shopping at an open micro-market cooler.
- **AI Product Recognition:** Integrated weight sensors and visual camera technology instantly detect which items were removed.
- **Automatic Billing:** Once the door closes, the customer's card is charged automatically for the exact items taken. If someone opens the door and grabs 3 items, all 3 items are charged before they even walk away. No honor system, no unpaid inventory.

Phased Expansion Strategy

Instead of a major installation on day one, we recommend a smart, scalable rollout that responds to actual tenant demand:

Figure 1

Figure 2

1. **Phase 1 (Launch):** Install a high-capacity AI Smart Vending unit (Figure 1). This immediately gives tenants a wide variety of cold beverages, yummy snacks, and healthy meal options with zero footprint risk.
2. **Phase 2 (Growth):** We track real-time purchasing data to analyze tenant traffic and product velocity. After 90 days, we evaluate the partnership and make plans for expansion.
3. **Phase 3 (Micro-Market Hub):** As demand scales, we add adjacent AI smart units to create a full, modular micro-market wall customized to your building's needs. (Figure 2)

Product Selection: Tailored Corporate Offerings

Because AI coolers do not rely on restrictive wire coils, we can stock healthy options and uniquely packaged items that traditional machines cannot hold:

- **Lunch Items:** sandwiches, salads, wraps
- **Cold Beverages:** Sparkling waters, energy drinks, sodas, and protein drinks.

- **Snacks & Healthy Options:** Chips, protein bars, nuts, dried fruit, and traditional favorite snacks.
- **Dynamic Stocking:** We monitor inventory remotely and swap out slow-moving items monthly to keep the selection fresh and engaging.

The Service Promise (Zero-Cost Amenity)

Our program is a **100% free amenity** to Perry Commercial. We cover all equipment costs, delivery, installation, stocking, and maintenance.

Profit Share Percentage: 5%

Feature	Our Standard
100% Theft Protection	Pre-authorization required to unlock; automatic AI billing on door closure eliminates shrinkage.
Remote Monitoring	Real-time inventory alerts ensure equipment stays stocked and fresh.
Zero Management Hassle	QR code on-machine refunds and direct customer support so your staff never handles tenant complaints.

Next Steps

1. Review proposal details with the Perry Commercial management team.
2. Schedule a brief 10-minute site walk to select the ideal location for the Phase 1 AI Smart Cooler.
3. Confirm targeted product preferences for launch.
